Sentinel-2, Esri imagery
OpenStreetMap, SoilGrids, elevation tiles
Field map, demarcation, Sentinel-2 indices
Image analysis, water sources, soil
Terrain, flow, gullies, sensors, retention
Monitoring zones (a year of scenes)
Variable-rate irrigation, zones, field report
Field sketch (becomes design inputs)
Weather file (CSV, XLSX, DWF, DLF, DAI)
Open-Meteo, DMI (online)
One project: state of the Properties panel and weather (WXD)
Engine 1: model() annual meta-model, ensemble maps
Engine 2: daily 40-layer water balance (seasonSim)
Crop water balance (CWB) FAO-56, crop library
Per-year Daisy runs (20 seasons, pickRun)
Phenotyping model (deterministic)
Process, mulch and regime layers (field, V1 to V7, E1, N1 to N3, R1)
Design layers: surface, drip, sprinkler, plan, when to plant
Seasonal layers (Y1, W1, N4, C1)
Phenotyping layer P1 (five parts)
Daisy layers (C2, D1)
Bridge to the workbench (bridge.js)
Properties panel, layers tree, toolbox
Dashboard: results, charts, messages
Outputs: pictures, CSV, reports, .swafl project
Run gate (Run simulation)
Data within a part
Outputs
Information within a part
Data between parts
Information between parts
Daisy workbench (js/daisy*.js)
DAISYLIVE
Planner (offline reader, online assistant)
Decision base, experiments E0 to E16, scenarios
Daisy 7.1.14 (.dai in, .dlf out)
Parsers and annual summary (daisyio, daisysum)
Hand-over (daisyflow) DAISYLIVE
Figures, citation, raw files
