Inputs and movement of data within a part
Outputs
Exchange of information within a part
Movement of data between parts
Exchange of information between parts
Weather: stations, own file, Open-Meteo, DMI (daisyonline)
Soil horizons, crop library, parameters (32 tested in Daisy)
Your own set-up (.dai), set-up editor
Planner (daisyai) offline reader, online assistant
Decision base (daisyref, manual) 54 factors, soils, stations
Experiments (daisyexp, daisyscen) E0 to E16, designs, scenarios
Daisy 7.1.14 (.dai in, .dlf out) bundled, Windows
Parsers and annual summary (daisyio, daisysum)
Hand-over (daisyflow) DAISYLIVE
DAISYLIVE
Process map (daisyproc) 14 processes, 76 components
Figures of the experiments (daisyexpfig, spec)
Raw files as Daisy wrote them (daisyraw)
Figures, tables, citation (daisyfig, daisyplot, daisyfigkit, daisycite)
SWAFL layers C2, D1, dashboard
Model development (work before Daisy is started)
Soil column (Richards, Daisy horizon library)
Response curves (retention, denitrification, PLF functions)
Calibration (sequential, CMA-ES, Bayesian)
Parameter library (daisyparams, 32 tested)
(Not all connections between parts are shown)
