Own files, sketch
Water, roads (OSM)
Sentinel-2 scenes
Terrain (Copernicus)
Soil (SoilGrids)
Weather, five sources
Field sketch and zones
Vegetation indices, image analysis
Terrain, gullies, soil loss, sensors
Zone-by-zone irrigation, report, prescriptions
One project: soil, crop, weather, mulch, irrigation and working date
Irrigation design surface, drip, sprinkler; schedule and when to irrigate
Decision layers (22) trigger and sensor, mulch, soil structure, water balance, seasons, feedback loops
Deterministic phenotyping plant, roots, drought
Crop library 48 crops (Kc, roots, depletion, Ky)
Computing engines below
Engine 1 meta-model of 10,190 Daisy runs
Engine 2 daily 40-layer water balance
Design modules surface, drip, sprinkler
Daisy workbench 17 experiments, runs read back
Field report (PDF)
CSV and pictures
Prescription maps
.swafl projects
