Daisy workbench (SWAFL 1.1.0)
Input data
Experiments and scenarios
Process structure
Results and analysis
Decision support
Model development
Weather and site
17 prepared experiments (compact designs)
Process map (14 processes, 76 components)
Log plots
To the SWAFL layers (chem, dsum, ...)
Set-up editor (.dai)
Parameter library (soils, crops, fertilisers)
Own factorial designs (53 factors)
Mass balance
Soil column (Richards)
5 scenarios + AI plan
Run comparison
Response curves
Calibration (3 optimisers)
set-up files (.dai) down, logs (.dlf) up
Daisy 7.1.14 (bundled, Windows) - runs the set-ups; its logs (.dlf) are read back by the workbench
